

## **RIVERSTONE PARTICIPATION IN INDUSTRY ESG INITIATIVES**

[November 5, 2021, New York] Riverstone Holdings LLC (Riverstone) is pleased to announce it has become a member of Initiative Climat International, a signatory to the Institutional Limited Partners Association's (ILPA) Diversity in Action initiative, and a participant in the ILPA-led ESG Data Convergence Project.

Riverstone's decision to partake in these initiatives further crystallizes its commitment to review and integrate, where appropriate, evolving ESG best practices into its investment decisions and operations.

Each of Initiative Climat International, Diversity in Action, and the ESG Data Convergence Project are examples of industry-wide best practices that further help Riverstone build upon its existing ESG monitoring and disclosure program.

- Initiative Climat International, a private equity-focused collective, fosters a commitment among industry participants to better understand and reduce carbon emissions of private equity-backed companies and secure sustainable investment performance.
- ILPA's Diversity in Action initiative brings together limited partners and general partners who share a commitment to advancing diversity, equity and inclusion in the private equity industry. The goal of the initiative is to motivate market participants to engage in the journey towards becoming more diverse and inclusive and to build momentum around the adoption of specific actions that advance diversity and inclusion over time.
- The ESG Data Convergence Project's primary objective is to streamline the private equity industry's historically fragmented approach to collecting and reporting ESG data in order to create a critical mass of meaningful, performance-based, comparable ESG data from private companies. The project encourages private equity industry stakeholders to work together to gather better, decision-useful ESG data in order to generate deeper insight into ESG factors and their relationship to financial outcomes, and, ultimately, to drive greater progress on critical ESG issues.

As previously reported, Riverstone became a signatory to the UN-supported Principles for Responsible Investment (PRI) in 2020. The PRI is an investor-led initiative working to create a more sustainable financial system. Over 4,000 organizations have become signatories which provides a framework for investors to integrate ESG factors into their investment decision-making process and ownership.

Riverstone's engagement with these respective groups reinforces its commitment to continue to promote ESG standards for both itself and its portfolio companies, and its desire to help with the development of ESG best practices across the industry.

### **About Riverstone Holdings LLC**
